Fence Installation Company

So you're considering having a new fence built? Allow a licensed fence installation, Affordable Fence Guys help you make the best decision for residential and commercial fence installation in Rock Hill SC, Fort Mill SC, Lancaster SC, Columbia SC, Charlotte NC, Gastonia NC, and other surrounding North Carolina and South Carolina areas.

We'll start by explaining it comes down to 2 considerations when installing your fence: Form and Function. While there usually is a happy marriage between Form (style) and Function (practicality), sometimes it's not and we'll be the first to help you understand why.

For example, you might live in a HOA neighborhood and be required to have a split rail fence installation, on the other hand you may want a split rail fence but no HOA and a pasture fence style would be more practical for the fences lifespan. However, you have major security concerns in your neighborhood and need a chain link fence or a privacy fence installation instead.

As you can see in this example, you might need to choose Function (security) over Form (aesthetics).

Wood Fences

Pine Fences

Pine has been used locally as the best option for wood fences, proving itself as a sustainable material for many generations. Naturally resistant to rotting and decay, pine requires very little maintenance, and staining every few years. Pine has the quality of weathering over time with proper care, provides a nice clean look. Pine is also natural and environmentally friendly.

How Much Does Pine Fencing Cost?

Pressure-treated pine fences cost anywhere from **\$10 to \$25 per linear foot**, including installation. If you need 150 linear feet of fencing - which is fairly typical for a residential backyard - budget anywhere from **\$1,500 to \$3,750**.

- Price - Pressure-treated pine is the least expensive of fencing materials, priced significantly less than cedar.
- Better material for posts - Although cedar is overall the more durable of the two materials, pressure-treated pine stands up better when it is exposed to soil. Because of this, most cedar fences have posts that are made of pressure-treated pine and boards made of cedar.

Pressure-treated pine has a greenish tint that over time. With regular maintenance, pine fences can last beyond 15 years even up to 30 years depending on weather conditions and maintenance.

AFFORDABLE FENCE GUYS

Aluminum Fences

Ornamental aluminum fence is the common sense product for long term durability and warranties as it is virtually maintenance free and will not rust or rot versus wood and steel products.

We provide a scale of different ornamental aluminum fencing for every neighborhood, home style and application from appearance to function. For a low-maintenance, strong / durable decorative fence to get the classic wrought-iron look, choose Aluminum™ fencing.

Our aluminum fencing has the strongest aluminum alloys, and incorporates more aluminum in our rails and pickets than most of our competitors. All the components of our Residential Fences are factory assembled with aluminum fasteners to ensure structural integrity. The entire assembly is protected with a Powder coat finish, a durable finish that gives the aluminum a nice finished look.

All of our fencing sections are in 6' lengths of heights — 48", 54", 60", and 72". We can follow modest changes in grade along your property lines.

Vinyl Fences

Although vinyl fencing is relatively new, it has become increasingly popular due to its high durability and virtually unlimited longevity. Also, there is almost no maintenance required for vinyl fencing and it comes with a manufacturer's Lifetime Warranty.

Vinyl Fence Contractor

Affordable Fence Guys of Charlotte is proud to be the Premier Vinyl Fence Charlotte NC installation contractor. Affordable Fence Guys is an innovator in vinyl fencing and installs a highly successful interlocking picket / rail system which is rated for 100+ mph sustained winds.

Fabrication Experts

Affordable Fence Guys specializes in vinyl fencing and is one of the largest and most trusted suppliers and installers of vinyl fencing. We purchase the highest quality vinyl fence extrusions and components from the most trusted manufacturers because they know the weather conditions locally therefore we only install high-standard fencing products.

AFFORDABLE FENCE GUYS

Chain Link Fences

Chain link fences are economical, require very little maintenance, and can be modified to look attractive. They are made from galvanized steel, but can also be vinyl coated. For security purposes, it's hard to beat a chain link fence.

Still, there are many add-on parts to make them more attractive and provide more privacy and protection, such as colored fence fabric, colored fittings, and framework (posts and rail).

Horse / Pasture Fences

Wood Rail Horse Fence

Wooden Rail Horse Fence is a traditional variety of Horse Fence and its attractive, relatively inexpensive and properly maintained will last for years to come.

Vinyl | PVC Horse Fence

A fast way to improve the look of your farm, few fences have the crispness as vinyl or plastic Horse Fence. It adds horse fence / pasture fence street appeal and increases the value of your property at the same time.

Electric Horse Fence

Hot wire horse fence is normally used as temporary fencing. We never recommend using electric Horse Fence by itself in a congested area or if you live near a busy road.
